### 1.25 **TECHNOLOGY ACCESS**

- A. When procuring a technology product or when soliciting the development of such a product, the State of Arkansas is required to comply with the provisions of Arkansas Code Annotated § 25-26-201 et seq., as amended by Act 308 of 2013, which expresses the policy of the State to provide individuals who are blind or visually impaired with access to information technology purchased in whole or in part with state funds. The Prospective Contractor expressly acknowledges and agrees that state funds may not be expended in connection with the purchase of information technology unless that technology meets the statutory Requirements found in 36 C.F.R. § 1194.21, as it existed on January 1, 2013 (software applications and operating ICSs) and 36 C.F.R. § 1194.22, as it existed on January 1, 2013 (web-based intranet and internet information and applications), in accordance with the State of Arkansas technology policy standards relating to accessibility by persons with visual impairments.
- B. Accordingly, the Prospective Contractor expressly represents and warrants to the State of Arkansas through the procurement process by submission of a Voluntary Product Accessibility Template (VPAT) for 36 C.F.R. § 1194.21, as it existed on January 1, 2013 (software applications and operating ICSs) and 36 C.F.R. § 1194.22, that the technology provided to the State for purchase is capable, either by virtue of features included within the technology, or because it is readily adaptable by use with other technology, of:

- D. For purposes of this section, the phrase "equivalent access" means a substantially similar ability to communicate with, or make use of, the technology, either directly, by features incorporated within the technology, or by other reasonable means such as assistive devices or services which would constitute reasonable accommodations under the Americans with Disabilities Act or similar state and federal laws. As provided in Arkansas Code Annotated § 25-26-201 et seq., as amended by Act 308 of 2013, if equivalent access is not reasonably available, then individuals who are blind or visually impaired **shall** be provided a reasonable accommodation as defined in 42 U.S.C. § 12111(9), as it existed on January 1, 2013.
- E. If the information manipulated or presented by the product is inherently visual in nature, so that its meaning cannot be conveyed non-visually, these specifications do not prohibit the purchase or use of an information technology product that does not meet these standards.

**1.26 COMPLIANCE WITH THE STATE SHARED TECHNICAL ARCHITECTURE PROGRAM**

The Prospective Contractor's solution **must** comply with the State's shared Technical Architecture Program which is a set of policies and standards that can be viewed at: <https://www.dfa.arkansas.gov/intergovernmental-services/state-technology-cost-analysis/architecture-compliance/>. **2.1 INTRODUCTION**

The Arkansas Energy Office is in the process of updating the Arkansas Energy Code. Part of that process is involving statewide stakeholders to gain feedback and input to establish consensus for a new version of the Arkansas Energy Code for New Construction. To that end, the Arkansas Energy Office is soliciting proposals for services to facilitate stakeholder meetings and reach a consensus draft of the Arkansas Energy Code to be approved through legislative process.

The 2014 Arkansas Energy Code is based on the 2009 IECC and includes Supplements and Amendments based on Stakeholder input. The Arkansas Energy Code has traditionally included two components: A model code (IECC) version incorporated as reference, and Arkansas Supplements and Amendments. The Supplements and Amendments are intended to eliminate, add to, or modify requirements in the model code to align with the priorities of Arkansas Stakeholders. Supplemental non-regulatory information may be included to aid in implementation, compliance, or enforcement of the Arkansas Energy Code.

Historical background: The update process for the current code, the 2014 Arkansas Energy Code, began in 2011 and was adopted in 2013 using the 2009 International Energy Conservation Code (IECC), effective January 2015. After the 2014 Arkansas Energy Code went into effect in 2015, the Southeast Energy Efficiency Alliance conducted an Arkansas home study to verify compliance with the new code and identify areas of improvement. The results of that field study are available at

[https://www.energycodes.gov/sites/default/files/documents/Arkansas\\_Residential\\_Field\\_Study.pdf](https://www.energycodes.gov/sites/default/files/documents/Arkansas_Residential_Field_Study.pdf). In general, the study found that the *average* home met or exceeded the new minimum requirements, but full compliance for all homes had areas for improvement including duct leakage, envelope leakage, and wall insulation.

Benefits to upgrading the Arkansas Energy Code include:

- Reduced monthly utility costs for the owner/occupant
- Create a more comfortable occupancy space while maintaining safety and health standards
- Legal qualification for FHA mortgage loans and FEMA disaster relief
- Reduced strain on electrical and gas utility infrastructure, allowing more customers to be serviced with smaller infrastructure projects, which in turn maintains lower service fees.
- Reduced CO2 emissions from electric power generation or gas consumption

- Prevention of expensive retrofit installations of efficiency provisions by putting them in place during the construction phase of a building
- Ensuring consistent quality and modern technology in the new additions to the Arkansas real estate market, and ensuring the energy requirements are cohesive with other building code disciplines.
- Economic benefits— The long-term savings that will result can be “recycled” in the local economy as purchased goods and services

AEO anticipates adopting an updated version of the Arkansas Energy Code in 2021 which would go into effect in 2022. In order to adopt a new code in 2021, AEO anticipates a complete draft of the new provisions will be ready by December 2019. Specific concerns from initial review and preliminary discussions with stakeholders include air sealing and duct sealing requirements, attic insulation, and wall insulation requirements.

The 2014 Arkansas Energy Code is available at <https://www.adeq.state.ar.us/energy/incentives/building.aspx>.

## 2.2 **PERFORMANCE STANDARDS**

- A. State law requires that all contracts for services include Performance Standards for measuring the overall quality of services provided that a Contractor **must** meet in order to avoid assessment of damages.
- B. The State may be open to negotiations of Performance Standards prior to contract award, prior to the commencement of services, or at times throughout the contract duration. *Section 2 and Section 3* identify expected deliverables, performance measures, or outcomes; and defines the acceptable standards.
- C. The State has the right to modify, add, or delete Performance Standards throughout the term of the contract, should the State determine it is in its best interest to do so. Any changes or additions to performance standards will be made in good faith following acceptable industry standards, and may include the input of the Contractor so as to establish standards that are reasonably achievable.
- D. All changes made to the Performance Standards will become an official part of the contract.
- E. Performance Standards will continue throughout the aggregate term of the contract.
- F. Failure to meet the minimum Performance Standards as specified will result in the assessment of damages.
- G. In the event a Performance Standard is not met, the Contractor will have the opportunity to defend or respond to the insufficiency. The State has the right to waive damages if it determines there were extenuating factors beyond the control of the Contractor that hindered the performance of services. In these instances, the State has final determination of the performance acceptability.
- H. Should any compensation be owed to the State agency due to the assessment of damages, Contractor **shall** follow the direction of the State agency regarding the required compensation process.

## 2.3 **SCOPE OF WORK**
