

EnviroView

EnviroView includes map layers from 31 different datasets. You can view facilities with ADEQ permits that regulate air emissions, water discharges, mining, fuel storage tanks, solid waste, and waste tires. Additional map layers show hazardous waste generators, ADEQ inspection districts, and environmental information, such as ecologically sensitive streams and water bodies, extraordinary resource waters, and natural and scenic waterways. Other supporting layers, such as congressional districts and census tracts, are supplied by other state and federal agencies.

EnviroView Datasets

- 1) Permitted Sites
- 2) Regulated Facilities
- 3) RATFA Sites (Remedial Action Trust Fund Act)
- 4) Ecologically Sensitive Streams
- 5) Ecologically Sensitive Water Bodies
- 6) Engineering Institutional Controls
- 7) Extraordinary Resource Water Lakes
- 8) Extraordinary Resource Waters Segments
- 9) Fish Data
- 10) Macroinvertebrates
- 11) Mercury in Fish Sampling data
- 12) Inspector Districts Air
- 13) Inspector Districts RST (Registered Storage Tanks)
- 14) Inspector Districts Solid Waste
- 15) Inspector Districts Water
- 16) Natural and Scenic Waterways
- 17) National Hydrography Dataset High Resolution Point
- 18) National Hydrography Dataset High Resolution Area
- 19) National Hydrography Dataset High Resolution Waterbody
- 20) National Hydrography High Resolution Flowline
- 21) 2016 4a Lakes
- 22) 2016 5a Lakes
- 23) 2016 4a Streams
- 24) 2016 5 Streams
- 25) Use Attainability Analysis Segments
- 26) Trout Lakes
- 27) Trout Streams
- 28) Total Maximum Daily Load
- 29) Flow Direction
- 30) Ecoregions
- 31) ADEQ and Field Offices
