

ALTERNATIVE DAILY COVER (ADC) FORM

(Arkansas Pollution Control and Ecology Commission Regulation No. 22.413 and 22.512)

Proposed Alternative Daily Cover Material: _____

Check this box to acknowledge the stockpile of alternative material will also be controlled for disease vectors, fires, odors, blowing litter, and scavenging.

1. Describe how the material/mixture will be applied to the active working face, thickness, and the frequency of use of the alternative daily cover. Be aware that depending upon what material is used, at least six inches of earthen material must be used at a minimum of once per week.

2. Please complete the areas below describing site-specific methods and procedures that will be implemented:
 - Describe how the alternative daily cover will control disease vectors.

 - Describe how the alternative daily cover will control fires.

 - Describe how the alternative daily cover will control odors.

 - Describe how the alternative daily cover will control blowing litter.

 - Describe how the alternative daily cover will control scavenging.

 - Describe how the alternative daily cover will limit the generation of leachate.

3. Describe the length of the demonstration period with justification for the proposed timeframe.

4. Comments (include any additional information to be considered in evaluating this alternative daily cover request):

By signing below I acknowledge the information is true and accurate. If any information changes, it is my responsibility to notify OLR immediately to amend the site-specific methods and procedures described here.
